#### DOCTOR SAID

Much Sickness Caused by Coffee Drinking.

It is wise to use care in the selection of your table beverage. The experience of several ill families proves this, and one of them is a very interesting story.

"We were induced to quit coffee about eight years ago because of its injurious effects. The doctor advised us to stop it entirely, and we began to use Postum."

"While we drank coffee we had headache, sleeplessness, stomach troubles, palpitation of the heart, etc. We have found no injurious effects from Postum, and are clear of all the old coffee troubles. It has a fine color, a delicious flavor, and we feel free to drink all we wish of it."

"My brother's family has used Postum for eight years, and has been benefited as we have. A Swedish family, neighbors, used to drink coffee for years, but finding it harmful, have quit and now use Postum."

"A number of other families we know here who were habitual coffee drinkers, with the usual results, have now taken up Postum. The doctors here say much sickness is caused by drinking coffee."

"Some of them did not like Postum at first, but when we showed them how to make it dark and rich, according to directions on pkg., they liked it better than coffee, and it agrees with them."

Name given by Postum Co., Battle Creek, Mich. Read "The Road to Wellville," in pkgs. "There's a Reason."

#### DELICIOUS TOASTED BREAD WHILE WAITING

A child can make delicious toast on the table as fast as any one can eat it as a result of a new electric toaster recently brought here by the Passenger and Power Company, Seventh and Main Streets. This toaster is more safe in operation, and also more economical, than any stove or heater ever before put on the market.

Set the toaster on your table and connect with the current wires in your house, and then put bread in the nickel steel wire racks as fast as you want the toast made. The result is that the old and stale bread comes out deliciously crisp and appetizing. These toasters are easier, cheaper and better than any other means yet discovered for making toast.
